# Sealegs 7.7M Full Width Console Rib

Boat Type: Inflatable

# OVERVIEW

The Sealegs 7.7m Wide Console RIB is the king of the open-top Sealegs RIB family. At 7.7m long, the Wide Console boasts impressive deck space and payload capacity, with a console spanning the full way across the deck to protect you and your passengers from the elements.

With an outboard upgradable to 200HP, the Sealegs 7.7 Wide Console rides beautifully. It comes equipped with Sealegs state-of-te-art amphibious technology, as well as a rugged fold-down windscreen and myriad options to suit your needs. ?

#### The Benefits

- Single handed operation, giving one person the freedom to launch their boat by themselves
- Immediate access to and from the water no waiting, backing trailers, winching or parking
- Embarking and disembarking no longer means getting wet
- Children can safely be in the boat at all times, avoiding possible accidents
- More time on the water, less time spent getting in and out of water
- The ability to explore places inaccessible in a traditional boat
- Greater use of your investment

Total Berths:	-	Crew				
Total Sleeps:	-	Crew				
Total Heads:	-	- Crew Heads:				
Captains Cabin:	No					

# FEATURES

### **Craft Features**

Each Sealegs craft is powered by Sealegs patented Amphibious Enablement System, or AES. The AES, including a fully marinised system of hydraulically powered legs and wheels, is powered by a marinised 22HP inboard engine. This allows the craft to travel for up to 30 minutes within every hour at 7.5kph on land.

The fully integrated, turn-key package uses the same fuel source as the outboard, and is simple to learn and engage. Over time, the AES technology has improved to allow owners more freedom to use their Sealegs amphibious craft.

All Sealegs craft come standard with All Wheel Drive (AWD). Both the front wheel and rear wheels have their own wheel motor. This allows for maximum traction and terrain capability when encountering beach inclines of soft sand, shell, shingle and/or pebbles.

AWD greatly increase the maneuverability of Sealegs craft, but if further traction is required, reducing the pressure in tires can further increase traction in difficult terrain. Finally, diff-lock is available as an option to augment the

functionality of AWD.

The diff-lock option allows operators to force all wheels to turn in unison, regardless of traction (or lack thereof) available to all wheels. This, combined with AWD, will allow a Sealegs craft to overcome more extreme conditions.

Max Payload (including passengers): 700kg (1543lbs) Max passengers: 8 Persons, including driver Fuel Capacity - Petrol: Below deck 180 litre (48 U.S. Gallons) Top speed Max (Water): 40 knots (74kph/46 mph) Recommended & Max Outboard: 1x 150HP (112 kW) Top speed Max (Water) - 150 HP: 40 knots (74kph/46 mph) Top speed Max (Water) - 200 HP: 42 knots (78kph/48 mph) Recommended Outboard: 1x 150HP (112 kW) Maximum Outboard: 1x 200HP (149 kW) Top speed (Land): 7.5kph (5mph) On-land power: Inboard Petrol engine, Honda - 24HP (18kW) 4-stroke, air cooled Drive (Land): All wheel drive, Permanent with optional momentary diff lock Brakes: Primary/Dynamic - Hydrostatic, Emergency/Automatic Park - Hydraulically released mechanical brake Steering: Seastar power assisted hydraulic steering Batteries: 1100CCA High Crank, Optional second battery (1100CCA) with selector switch Seating: 2x Pedestal seats with gas strut suspension, adjustment in 2 axis and fold up bolster. Twin forward seat. Twin rear seat. Storage: Under-seat in front of console, port hatch in console, fwd wet locker Console: Fold-down full width console. Stbd helm station & Port Nav. station Tyres: 25"x 12" all terrain 6-ply tyres on 12" alloy rims Tubes: 6 chamber, Hypalon tubes. 520mm diameter Drainage and bilge: Dual scuppers, 1100gph (4164Lph) bilge pump Lighting: Dual halogen marine headlights (land use only), LED navigation lights Deck: 3M anti-slip deck tread Run Time (Land): 30 min continuous run time with alarms Maximum incline (Land): 14 Degrees (25% gradient) up or down, Avoid driving across a transverse incline. Maximum sea conditions: Up to 4.0m (13' 1") wave height, Up to 40 knot (74kph/46 mph) winds Certifications: CE Cat C, U.S.C.G.
