

Axopar 37 XC Cross Cabin

Boat Type: Center Console

OVERVIEW

The new Crossover that challenges convention in both looks and onboard functionality bringing a new era to all-weather boating.

This model combines the functionality, ease of movement, social outdoor and indoor spaces and versatility of outboard walkaround centre-consoles with a spacious, fully enclosed weather proofed cabin, that with distinctive looks challenges traditional perceptions of cabin boats.

We consider the 37XC to be the Gran Turismo of the seas opening a world of possibilities for safe, extended voyages in comfort even in unpredictable weather.

Every foot on board is used for socialising and practical living; indoors and now outdoors as well, infused with a myriad of new onboard solutions and functionalities, no matter if cruising along or spending time at anchor.

The innovative Gullwing Door concept* opens up the front cabin, the sociable foredeck seating with table* or with the large sun-deck*, in addition with its versatile aft-deck modules ensures our customers get a boat with the equipment

they want. The large sliding canvas roof, together with the two large sliding doors, really opens up the cabin to the elements on days when the weather allows.

Forget the old prejudice that a cabin boat is all just about spending time inside its cabin; the new Axopar 37 XC raises the outer spaces to equal importance and functionality, as sociable and practical as it is comfortable inside. Never before has an all-weather boat looked this striking, instantly turning heads wherever you go with its captivating modern looks, challenging the perception of traditionally 'boring' enclosed cabin 'work' boats.

The Axopar 37 XC Cross Cabin takes you further on your journey, whether it be in the harsh cold seas of Svalbard, in the sunny and warm Caribbean or in the bustling scenes on Manhattan, it is the perfect platform for every adventure at sea.

SPECIFICATIONS

FEATURES

Driver in Focus

New intuitive solutions that brings the driving experience even closer to the ease and simplicity of driving a car. Redefined ergonomics contributing to a supremely practical and functional layout, with excellent all-round visibility. The driver focussed helm, with its clean and uncluttered dashboard, ensures the skipper will always remain in full control.

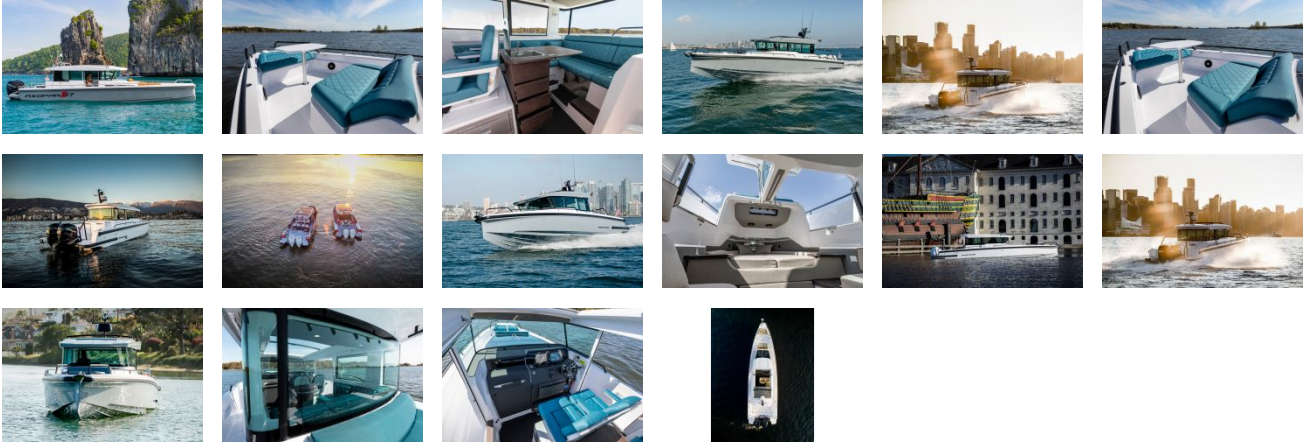

Significant performance gains

Up to 30% better fuel-economy across the 20 to 40 knot speed range, compared to the predecessor. Resulting in an extended cruising range, on average with 35% or +75 additional nautical miles. Up to +35% increase in 'comfortable' and most efficient cruising speed at steady 3500rpm, up from 22knots to 29 knots

The Gullwing door concept

The Gullwing Doors redefines how an enclosed front cabin can be best utilised to provide a more sociable feeling and full interaction with one's surroundings, making the front cabin feel like it's part of the outdoors. Now it is possible to fully interact with and appreciate the outside surroundings like never before
