# Scout 350 LXZ

Boat Type: Cruiser

## OVERVIEW

Scout's vision was to create something so elevated - in not only styling and innovation, but also performance – that we charted a course to re-imagine and perfect what a Luxury Crossover should be. A model that follows suit with industry breakthroughs like its sister LXF (luxury center console) predecessors, coupled with additional sleek design & functional ideals that can be found on our popular Dorado (dual console) Series.

This incredible model, complete with its stronger, sexier, faster hull design...will give you peak performance over any model perceived in its category, all with a "Class-A finish". A seating configuration built around plush, luxurious entertainment expectations; immense shade provided by the integrated hardtop; a full glass windshield to protect from the elements complete with a sliding sun roof and side window vents; air conditioning above and below deck; swing-in side dive door; a gyro stabilizer; systems completely run on lithium ion batteries (no generator necessary); and at-home appointments throughout the model are just a brief snapshot of the standard and available optional features we're building into this must-have craft.

## SPECIFICATIONS

### Basic Information

Manufacturer:	Scout	Boat Type:	Cruiser
Model:	350 LXZ	Hull Material:	
Year:	2020	Hull Type:	
Category:	Power
