J/112E Receives Finishing Touches

It's been said that good things come to those who wait. And if the pictures of the J/112E coming out the door at J/Composites are any indication, it's been well worth the wait for the newest addition to our "E" range of sport cruisers. The J/97E and J/122E have been huge hits at the autumn boat shows, and the United States Boat Show (Annapolis) is coming up next week. The J/112E is poised to join the "E" fleet with an expected launch date later this month in Rhode Island, where the J design team and Didier LeMoal of J/Composites will be on hand for sea-trialing and demo-sailing. Demo sails are planned to begin October 31st. Please contact Andi at andi@jboats.com to set up a sail!

Spacious, well lit interior with "double-wide" opening to forward cabin.

Exterior views just prior to shrinkwrap and loading for shipment to the USA.
